Uday Pratap Singh Parihar

Full Stack Developer · Next.js / React Native

Indore, India | +91 88199 23334 | work@udayps.com | uday-ps | UdayPS-4o | portfolio.udayps.com

PROFILE

Full-stack developer focused on **shipping production features** across **web and mobile**, and building efficient automation systems. Hands-on experience building **LLM-powered products**, developing **agentic workflows**, and **reverse-engineering complex APIs** to solve integration challenges. Comfortable with **high-throughput systems** and building reliable tools where documentation is limited. I dig into how systems work to deliver scalable, impactful solutions.

WORK EXPERIENCE

Founding Engineer, Akin Dec 2025 — Present

Mumbai, India - Remote

- Built and shipped a **React Native (Expo)** community app to the **App Store and Play Store**, now at **6,000+ registrations** with invite-only events running across **Delhi, Mumbai, New York and Dubai**.
- Shipped booking, digital tickets, location-based member discovery with maps, push notifications and **OTP/OAuth authentication**, backed by an **Express + PostgreSQL** API with **EAS builds** and **over-the-air updates**.

Software Engineer Intern, Tradyon May 2025 — Jul 2025

Bengaluru, India - Onsite

- Shipped production features and fixes across **web and mobile** (Next.js + React Native), improving chatbot UX and reliability on a live, customer-facing product.
- Designed and built **agentic LLM workflows** in Dify, orchestrating multi-step model calls against a **BigQuery**-backed global trade-data store to ground answers in real data.
- Extended the app's existing **data and services layer** to deliver **rich multimodal responses** — text alongside generated charts and graphs — directly inside the chat experience.

Founding Engineer, Delivo Jan 2023 — Feb 2025

Mumbai, India - Remote

- Owned the **full stack** as first engineer on a platform serving **9,000+ users** and **100k+ shipments**: architecture, REST backend and database design, auth and role-based access, and external integrations.
- Shipped **client and warehouse dashboards** turning live shipment data into actionable views for non-technical operations staff.
- Integrated **partner and carrier systems** under international shipping compliance; handled deployment, monitoring and production support.

FREELANCE PROJECTS

EHR Integration Layer — eClinicalWorks Aug 2025

- Reverse-engineered **encrypted request payloads** and built a custom API wrapper from traffic analysis, enabling **UI-free** patient creation and appointment scheduling where **no public API existed**.

High-Throughput E-commerce Automation — Myntra, Flipkart Dec 2023

- Built restock/price monitors and a request-driven bulk checkout engine at **under 2 s per order and 500+ concurrency**, with a centralized dashboard on **GCP Cloud Run** and automated card payments with **3DS/OTP** handling.

Field Operations Platform — FMCG distribution Sep 2025

- ERP-style web app (invoicing, stock transfers, reporting) plus an **Android/iOS companion app** with push notifications and geolocation.
- **Real-time** updates over Socket.IO, WhatsApp webhook and web-push messaging, Excel/PDF pipelines, and a custom ORM for a **legacy DBF database**.

SKILLS

Frontend: TypeScript, React, Next.js, Tailwind CSS, React Native (Expo), Flutter
Backend: Node.js, Express.js, NestJS, Python, PHP, REST APIs, WebSockets, JWT / OAuth
Databases: PostgreSQL, MySQL, MongoDB, Redis, BigQuery, Firebase
Cloud & DevOps: GCP (Cloud Run), AWS, Azure, Docker, Kubernetes, CI/CD, Linux
AI & Integrations: LLM APIs, Dify agentic workflows, Payments (3DS/OTP), Push & messaging, API/Android reverse engineering (Burp, Frida)

EDUCATION

IPS Academy, Indore, India 2023 — 2027

B.Tech, Computer Science
